Work Experience

Invensis Technology Pvt Ltd - Process Analyst

October 2024 - Present

- Independently manage import invoice validation and customs clearance for UK shipments (avg. 24 invoices/day across 2 trucks).
- Create 2 console numbers and 20–30 invoice numbers daily, ensuring accurate tracking and compliance.
- Handle the highest shipment volume in the team (20–30 invoices/shift).
- Validate 20–30 import documents daily, including invoices, BOLs, and customs forms.
- Use 2–3 Truck Reference Numbers daily for shipment validation by port.
- Communicate directly with UK clients and work in sync with the UK team for 8 hours/day.
- Developed an excel tool to Auto-calculate freight charges based on invoice weight and Auto-record and retrieve team-wise invoice counts, minimizing errors.
- Created an automated Invoice Count Calculator for the team at Invensis to replace the manual method of tracking processed files.
- Designed using Advanced Excel formulas to record, update, and retrieve individual and daily processing counts accurately, reducing manual errors and saving time
- Prepare safety and security forms as per new EU border rules implemented in January 2025.

Tata Consultancy Services - Process Associate

April 2021 - September 2023

- Validated logistics invoices via DHL EIST, improving accuracy and reducing errors by reducing errors by 15%.
- Used Excel for data analysis and reporting, managing large datasets efficiently.
- Operated AS/400 systems to streamline invoice processing workflows.
- Conducted invoice quality checks and document comparisons, achieving 98% accuracy.
- Suggested policy improvements, increasing efficiency by 20% and customer satisfaction by 25%.
- Automated parts of invoice verification, cutting processing time by 20%.
- Provided training, maintained knowledge resources, and ensured audit compliance.
- Handled invoice-related customer service queries, supporting long-term client relationships.
